

CHRISTIAN GUEVARA

guevaral.christian@gmail.com | github.com/chrisglw | christianguevaraportfolio.com

Analytical and adaptable professional applying computer science and project management principles to deeply understand complex problems, translate information into meaningful insights, and architect clear, practical, and scalable solutions to real-life problems.

SKILLS

Python	React	Git/GitHub	Microsoft Office
MySQL	HTML/CSS	Management	BlueBeam Revu

RELEVANT EXPERIENCE

Software Development Grader, BYU-Pathway Worldwide | Remote Jan 2026 - Present

- Evaluate and grade student software projects by reviewing source code, functionality, and specifications.
- Provided constructive feedback on code quality, logic, efficiency, and best practices.
- Ensured fair, consistent assessment using standardized rubrics and edge-case testing.
- C#, HTML, CSS, JavaScript, APIs.

Assistant Project Manager, Grating Systems Inc | West Haven, Utah Sep 2025 - Jan 2026

- Facilitated clear and consistent communication among clients, vendors, and internal departments.
- Identified and implemented process improvements and automation opportunities to enhance efficiency.
- Managed material procurement and supplier coordination, focusing on cost-effective and timely sourcing.
- Supported project accountability by tracking milestones and ensuring adherence to timelines.

Front-End Developer, Foxtree LLC | Idaho Falls, Idaho May 2025 - Jun 2025

- Redesigned and developed the company website to improve user experience.
- HTML, CSS, and JavaScript to modernize design and improve performance.
- Optimized site navigation to better showcase products, making it easier for users to find relevant information. Improved client-business interactions by simplifying the bid process.

EDUCATION

Bachelor of Science in Computer Science Sep 2021 - Dec 2024

Brigham Young University-Idaho | GPA: 3.73

- **Relevant coursework:** Programming w/Functions (Python) & w/Classes (C#), Data Structures, JavaScript, Algorithms and Complexity, Machine Learning, Big Data, and Database Design & Development.
- **Relevant Projects:** Developed and deployed a weather forecasting app on Hugging Face Spaces using **Streamlit**, **Docker**, and **Polars**. Integrated a real-time weather **API** for accurate, location-based forecasts, and created a responsive, user-friendly interface for smooth interaction and clear data visualization.

PERSONAL PROJECTS

Financial Management App

- Designed and developed a financial management app to manage accounts, track transactions, and facilitate transfer tracking between personal accounts.
- React, CSS, Firebase.
- Enabled real-time visibility and control over my personal finances through spending tracking and oversight of accounts, credit cards, and other financial activity.

WebFood: Restaurant Platform

- Developed a restaurant management platform for handling menus, orders, and pickups.
- React, Django with APIs, and MySQL.
- Enabled restaurants to manage orders independently, reducing reliance on third-party apps.
