CHRISTIAN GUEVARA

guevaral.christian@gmail.com | github.com/chrisglw | christianguevaraportfolio.com

Analytical and adaptable professional applying computer science and project management principles to deeply understand complex problems, translate information into meaningful insights, and architect clear, practical, and scalable solutions to real-life problems.

SKILLS

Python	React	Git/GitHub	Microsoft Office
MySQL	HTML/CSS	Management	BlueBeam Revu

RELEVANT EXPERIENCE

Junior Project Manager, Grating Systems Inc | West Haven, Utah   **Sep 2025 - Present**

- Facilitate clear and consistent communication among clients, vendors, and internal departments.
- Identify and implement process improvements and automation opportunities to enhance efficiency.
- Manage material procurement and supplier coordination, focusing on cost-effective and timely sourcing.
- Support project accountability by tracking milestones and ensuring adherence to timelines.

Front-End Developer, Foxtree LLC | Idaho Falls, Idaho   **May 2025 - Jun 2025**

- Redesigned and developed the company website to improve user experience.
- HTML, CSS, and JavaScript to modernize design and improve performance.
- Optimized site navigation to better showcase products, making it easier for users to find relevant information. Improved client-business interactions by simplifying the bid process.

Intern Software Developer, Skycom BPO | Remote   **Apr 2024 - Aug 2024**

- Collaborated on developing a meeting system for over 1,200 employees.
- React, Django, PHP, XAMPP, Postman, and Excel.
- Provided supervisors with accurate performance metrics and goal-tracking tools, improving agent evaluations and driving employee growth and retention in a dynamic call center environment.

EDUCATION

Bachelor of Science in Computer Science   **Sep 2021 - Dec 2024**

Brigham Young University-Idaho | **GPA:** 3.73

- **Relevant coursework:** Programming w/Functions (Python) & w/Classes (C#), Data Structures, JavaScript, Algorithms and Complexity, Machine Learning, Big Data, and Database Design & Development.
- **Relevant Projects:** Developed and deployed a weather forecasting app on Hugging Face Spaces using **Streamlit**, **Docker**, and **Polars**. Integrated a real-time weather **API** for accurate, location-based forecasts, and created a responsive, user-friendly interface for smooth interaction and clear data visualization.

PERSONAL PROJECTS

Financial Management App

- Designed and developed a financial management app to manage accounts, track transactions, and facilitate transfer tracking between personal accounts.
- React, CSS, Firebase.
- Enabled real-time visibility and control over my personal finances through spending tracking and oversight of accounts, credit cards, and other financial activity.

WebFood: Restaurant Platform

- Developed a restaurant management platform for handling menus, orders, and pickups.
- React, Django with APIs, and MySQL.
- Enabled restaurants to manage orders independently, reducing reliance on third-party apps.
